Profile

- Dynamic and innovative Full Stack Web Developer skilled in crafting seamless, user-friendly applications across frontend and backend. Leveraging expertise in JavaScript, HTML, CSS, and database management honed at CareerFoundry, Berlin, I bring a unique blend of technical and business acumen. With a Bachelor's in Economics and Education from Edo-State University and training in Technical Business Administration, I'm passionate about problem-solving and excel in applying modern management practices to deliver impactful results.

Experience

Full Stack Developer Intern Tech Startup Careerfoundry , Berlin

May 2024 — November 2024

I developed these applications on both the front-end and back-end with guidance from senior developers:

1. MyFlix App

A full-stack movie application that allows users to register, log in, browse movies, and manage their favorite lists.

2. ChatApp

A mobile chat app built with React Native, supporting real-time messaging and media sharing.
